

Saturday, July 17, 2010

- 5:30:04 PM European Weekend Testers** hello everyone and welcome to EWT27
- 5:30:15 PM Markus Gärtner** now let me switch to my account
- 5:30:33 PM Markus Gärtner** alright
- 5:30:48 PM Markus Gärtner** sathya signed up for this week but doesn't seem to be online
- 5:30:44 PM eusebiu blindu** Hi All
- 5:31:26 PM Ajay Balamurugadas** Hi All
- 5:31:40 PM Markus Gärtner** let's get the session started and hoping for some more to ping us to join
- 5:31:52 PM Markus Gärtner** as usual, let's get started with the brief introductions
- 5:32:33 PM Markus Gärtner** so, here's my piece: I'm Markus Gärtner, black-belt in the Miagi-Do school, cofounder EWT with Anna, Software Craftsman, blog: <http://blog.shino.de>
- 5:33:26 PM Ajay Balamurugadas** Ajay Balamurugadas, co-founder of WeekendTesting, Student of Miagi-Do School of Testing, blogs at [www.enjoytesting.blogspot.com](http://www.enjoytesting.blogspot.com) and tweets at [www.twitter.com/ajay184f](http://www.twitter.com/ajay184f)
- 5:33:40 PM eusebiu blindu** I am Eusebiu Blindu (Sebi), I work as a contractor for testing projects, have a blog at <http://www.testalways.com>
- 5:34:16 PM Markus Gärtner** great. So, let me ask a question first: did anyone of you have experience with online brokerage?
- 5:34:30 PM eusebiu blindu** like forex?
- 5:34:42 PM Markus Gärtner** in general :)
- 5:34:57 PM Ajay Balamurugadas** no.
- 5:34:58 PM eusebiu blindu** no not really
- 5:35:14 PM eusebiu blindu** buy/sell :)
- 5:35:22 PM Markus Gärtner** ok, then the mission we picked might fulfill its purpose :)
- 5:35:29 PM Markus Gärtner** that said, here's the mission for this week
- 5:35:42 PM Markus Gärtner** Product: Brown & Donaldson (<http://bdonline.sqe.com>)  
Mission: Brown & Donaldson (B&D) is an online brokerage firm. Test the B&D Web site.

First-time users will need to create a BDonline account. Since this is a test system, this account is not real - any transactions requested or executed via this account will not occur in the real world, only in the fictitious world of B&D (and will not make Weekend Testing rich, unfortunately). Once you have created an account, you will bypass this step and login with your username and password. While creating a new account, you will be asked to supply an authorization code. The session facilitators will provide you the authorization code in private.

Please test the web site until 4.30pm UTC, and report any bugs you find to <http://www.bugrepository.com>

**5:35:55 PM Markus Gärtner** This message has been removed.

**5:38:33 PM Markus Gärtner** just gave meeta and madhukar the session transcript so far

**5:39:30 PM Markus Gärtner** any questions so far?

**5:40:35 PM Ajay Balamurugadas** SSL account or non SSL?

**5:40:59 PM Markus Gärtner** well, what do you think? :)

**5:41:12 PM Markus Gärtner** or what do you need?

**5:41:14 PM Ajay Balamurugadas** I think it doesn't matter

**5:41:37 PM Markus Gärtner** well, you can also create two accounts and see if it does :)

**5:42:43 PM Markus Gärtner** no questions so far?

**5:44:05 PM Madhukar** whats the authorization Code

**5:44:07 PM Madhukar** ?

**5:46:11 PM Markus Gärtner** send you the code in private

**5:46:42 PM Madhukar** ok

**5:47:54 PM meeta prakash** i am not able to open training pages

**5:47:58 PM meeta prakash** has anyone tried to open it ?

**5:48:29 PM Markus Gärtner** since I'm alone this weekend, I hope that my connection will not drop during the discussion

**5:48:36 PM eusebiu blindu** ewt 27 is not there

**5:48:48 PM eusebiu blindu** in bug repository

**5:49:56 PM Markus Gärtner** oh, it's ewt 27 with a space

**5:50:15 PM eusebiu blindu** lol

**5:50:18 PM eusebiu blindu** yep it is

**5:50:19 PM** eusebiu blindu :)

**5:53:32 PM** Markus Gärtner everyone fine so far?

**5:54:17 PM** eusebiu blindu yeah its the bussines logic that I am not familiar with :)

**5:55:23 PM** Markus Gärtner oh, learning a new domain is of course part of the mission today :)

**5:56:12 PM** Markus Gärtner did you find something on the business domain that could help you?

**5:59:28 PM** meeta prakash i am not able to find EWT 27 on my project dropdown list

**5:59:45 PM** meeta prakash not able to search

**5:59:47 PM** Markus Gärtner it's the fourth entry in the drop down for me

**6:01:39 PM** Markus Gärtner got it?

**6:02:10 PM** meeta prakash yes, found it ... it is 2nd 1 for me

**6:02:20 PM** Markus Gärtner ok

**6:02:53 PM** meeta prakash 1 learning and 1 trap

**6:03:11 PM** meeta prakash eyes tend to see only those things that are in logical flow

**6:04:27 PM** Markus Gärtner sebi, I can't see the bug in the graphic you attached. Where do you think the rounding problem is?

**6:05:05 PM** meeta prakash i was searching for a small case 'e' or since whole list on dropdown was sequential, was looking for it focussed towards the end of the list

**6:05:28 PM** meeta prakash which was not correct as i assumed that list is sorted one

**6:05:46 PM** Markus Gärtner the problem is, that the name differs from the previous ordering :)

**6:06:42 PM** meeta prakash correct...even though u gave that to @Blindu, my brains were not focussed on that piece of info

**6:06:51 PM** Markus Gärtner ah :)

**6:07:03 PM** Markus Gärtner taking a look on the watch, we got roughly 20 minutes left

**6:07:15 PM** meeta prakash i went by logically what i wanted to see on the website

**6:12:07 PM** Markus Gärtner sebi seems to have minimized the chat window :)

**6:12:22 PM** Markus Gärtner everyone else is doing fine?

- 6:12:35 PM eusebiu blindu** sorry I had minimised
- 6:12:39 PM Markus Gärtner** I'm suspicious to have a dropped connection if no one writes something :)
- 6:13:44 PM eusebiu blindu** the screenshot is showing the second effect of the bug
- 6:13:58 PM meeta prakash** ok ... we'll keep a pen dancing :)
- 6:14:08 PM eusebiu blindu** sorry i didn't put better str
- 6:14:49 PM Markus Gärtner** second effect?
- 6:15:10 PM eusebiu blindu** I can enter for "Quantity" value 7.8
- 6:15:18 PM eusebiu blindu** and is read as 8 for example
- 6:15:47 PM eusebiu blindu** then (second effect) it adds in "Holdings" multiple items for the same symbol
- 6:15:52 PM Markus Gärtner** ah, in the Qty column
- 6:15:56 PM eusebiu blindu** yes
- 6:16:06 PM eusebiu blindu** without other values are not accepted
- 6:16:07 PM Markus Gärtner** but you cannot buy half a share, can you? :)
- 6:16:25 PM eusebiu blindu** I don't think is possible
- 6:16:36 PM eusebiu blindu** but the application accepts it and rounds
- 6:16:59 PM Markus Gärtner** ajay prefixes his bugs with some letters and a counter
- 6:17:16 PM Markus Gärtner** ok, sebi, now I understand the bug :)
- 6:17:19 PM meeta prakash** i entered junk values while creating account and it accepted
- 6:17:19 PM Madhukar** One more issue i can enter characters in field where i am supposed to enter number of shares
- 6:17:27 PM Markus Gärtner** the connection between the graphic and the text was missing for me
- 6:17:38 PM meeta prakash** so i can create any falsified identity and enter
- 6:17:39 PM Madhukar** and app does not give any errors and neither it allows me to proceed
- 6:17:57 PM eusebiu blindu** yeah i was trying to fill the noticeable issues and give details later
- 6:17:59 PM eusebiu blindu** :)

- 6:18:00 PM Markus Gärtner** oh, please, report the bugs you find to bug repository :)
- 6:18:15 PM Markus Gärtner** sorry, that I tried to clarify a bug for me while I read it
- 6:19:02 PM eusebiu blindu** In writing bugs I am lasy and have problems with my clients usually :)
- 6:19:16 PM eusebiu blindu** So I am used to be reasked
- 6:19:43 PM Markus Gärtner** bug aj2 is great
- 6:19:54 PM Markus Gärtner** it lists up steps for reproduction in just enough detail
- 6:20:13 PM Markus Gärtner** the bug advovavy course pays there, ajay :>
- 6:20:42 PM eusebiu blindu** yep its a nice one
- 6:20:43 PM Markus Gärtner** ten more minutes
- 6:24:28 PM Markus Gärtner** five minutes left
- 6:27:51 PM Markus Gärtner** testing seems to focus on the quotation feature :)
- 6:27:52 PM eusebiu blindu** I feel like a nerd giving an exam LOL
- 6:28:52 PM Markus Gärtner** i can see bugs from sebi, ajay and meeta so far
- 6:30:32 PM Markus Gärtner** time's up on my clock, now, I would like to see everyone getting back to the chat for the discussion
- 6:31:04 PM Markus Gärtner** sebi, ajay, meeta, madhukar
- 6:31:12 PM Markus Gärtner** oh, ram, too :)
- 6:31:32 PM Markus Gärtner** please give me a hint that you're back (if you're back)
- 6:31:39 PM eusebiu blindu** I am
- 6:31:45 PM Ajay Balamurugadas** Done
- 6:31:53 PM meeta prakash** markus, can we get 10 more mins to test ?
- 6:31:58 PM meeta prakash** and report ?
- 6:32:00 PM Madhukar** Yes we are back
- 6:32:21 PM Markus Gärtner** what do others say? 10 more minutes fine with you? (in the end it's your time)
- 6:32:40 PM eusebiu blindu** Thi exam is 40
- 6:32:41 PM Ram** looks like i was on time for debrief today; couldn't do much on exploring part; :)

- 6:33:07 PM eusebiu blindu** OK so I had a beer before this I must admit
- 6:34:09 PM meeta prakash** @markus...probably u can start with ppl who are done, I can be last in the queue
- 6:34:09 PM Markus Gärtner** ram, what's your full name for me to put up in the session report? :)
- 6:34:22 PM Markus Gärtner** works just fine with me, meeta
- 6:35:09 PM Markus Gärtner** I would like to pick sebi to go first maybe. Sebi, can you prepare a short summary on your course for the last hour to copy&paste into here?
- 6:36:17 PM Markus Gärtner** i think i'm still online, am I?
- 6:36:24 PM Markus Gärtner** my skype says so :)
- 6:36:27 PM Ajay Balamurugadas** yes, you are
- 6:36:32 PM Markus Gärtner** maybe ajay should go first :)
- 6:36:54 PM Ajay Balamurugadas** Lets spend 2 mins to get it pasted on offline editor
- 6:36:54 PM eusebiu blindu** Ok so I can go with my findings
- 6:36:58 PM meeta prakash** i lost reporting of 4 bugs :(
- 6:37:12 PM meeta prakash** i did not enter summary on the submission screen
- 6:37:17 PM meeta prakash** and it went
- 6:37:22 PM Markus Gärtner** ok, maybe ajay can prepare his summary while sebi writes his one
- 6:37:34 PM eusebiu blindu** Yeah I don't have one yet
- 6:37:49 PM Markus Gärtner** going "back" in the browser doesn't work? would be too bad
- 6:38:42 PM Markus Gärtner** madhukar, are you still with us?
- 6:39:01 PM meeta prakash** nope :( it did not
- 6:39:21 PM Madhukar** Yes
- 6:39:24 PM Madhukar** i am with you
- 6:40:03 PM Markus Gärtner** ah, great. can you please prepare a brief summary write-up on your testing course as well? we're going to discuss it right after ajay's
- 6:40:13 PM Madhukar** Sure...
- 6:40:32 PM Markus Gärtner** fantastic

- 6:41:43 PM Markus Gärtner** sebi, how much time do you need?
- 6:42:26 PM eusebiu blindu** I can go now maybe. But not paste all at once
- 6:42:37 PM Markus Gärtner** yes, go ahead :)
- 6:42:41 PM Markus Gärtner** please
- 6:42:42 PM eusebiu blindu** Ok.
- 6:42:53 PM eusebiu blindu** I first notice the "Create a new account" text uses very small fonts. Its hard to find to register or login. Application is missing correct copyright date.
- 6:43:42 PM eusebiu blindu** I found a problem with "Quantity" values where I can enter values like 7.8 (for number of shares) and it takes it as 8
- 6:43:57 PM eusebiu blindu** So its a rounding that it should not be
- 6:44:17 PM Markus Gärtner** so, what did you learn today?
- 6:44:56 PM eusebiu blindu** Its hard to test application that you don't have too much business logic knowledge
- 6:45:05 PM Ram** do you think rounding is a problem as long as they have funds there to buy that number of shares? it probably depends on the requirement there?
- 6:45:32 PM eusebiu blindu** You kind of avoid the issues related to business logic and focus on text and missing strings
- 6:45:36 PM Markus Gärtner** so, did you try to learn something about the business logic?
- 6:45:46 PM eusebiu blindu** Not so much
- 6:46:19 PM eusebiu blindu** I went with some assumptions that maybe need to be confirmed by someone
- 6:46:37 PM eusebiu blindu** with those quantity values for shares
- 6:46:42 PM eusebiu blindu** for example
- 6:47:07 PM Markus Gärtner** ok, I'm curious what others did to learn about the business logic there
- 6:47:30 PM Markus Gärtner** did anyone from the others know the business domain beforehand?
- 6:47:52 PM Markus Gärtner** I know that sebi and ajay didn't, as I asked them from the start of the session, but what about the others that joined later?
- 6:48:11 PM meeta prakash** I knew a bit by GK

- 6:48:26 PM meeta prakash** but not exactly to tune of this web page
- 6:48:35 PM eusebiu blindu** What is GK?
- 6:48:45 PM meeta prakash** then tried opening training pages but they did not open
- 6:48:54 PM meeta prakash** GK = general knowledge
- 6:49:02 PM Madhukar** shall i give a brief
- 6:49:08 PM Madhukar** from my end?
- 6:49:24 PM Markus Gärtner** let me ask first if eusebiu wants to add some more to his report, or if there are open questions
- 6:49:37 PM Madhukar** ok
- 6:50:01 PM Markus Gärtner** sebi, you're done with your report so far? any questions for sebi from others?
- 6:50:24 PM eusebiu blindu** Well I tried to go on the bussiness logic as much as possible though but still this is my most important point here
- 6:50:30 PM eusebiu blindu** As learning
- 6:51:18 PM eusebiu blindu** In order to feel productive we ignore the most important issues and go with what we know : inputs, missing pictures and text
- 6:51:19 PM Markus Gärtner** oh, you don't need to explain yourself, we're not on our daily jobs here :)
- 6:51:30 PM Markus Gärtner** absolutely
- 6:51:32 PM eusebiu blindu** no but its important
- 6:51:46 PM eusebiu blindu** I think a client wantsto know serious problems
- 6:51:52 PM eusebiu blindu** He can fix little stuff
- 6:52:10 PM Markus Gärtner** I think this is important
- 6:52:32 PM eusebiu blindu** But to learn the bussiness logic here you need a couple of weeks
- 6:53:17 PM eusebiu blindu** I would still hire testers with no BL knowledge then knowledge with no testing skills as long as there is a certain time to adjust
- 6:53:27 PM eusebiu blindu** That;s for my side
- 6:53:27 PM Ajay Balamurugadas** Sorry to jump in
- 6:53:40 PM Ajay Balamurugadas** I disagree with

**6:53:41 PM Ajay Balamurugadas** [10:14:59 PM] eusebiu blindu: Its hard to test application that you don't have too much business logic knowledge

<<

**6:54:04 PM Markus Gärtner** what do you disagree with there?

**6:54:20 PM Markus Gärtner** maybe elaborate it a bit :)

**6:54:50 PM meeta prakash** i second AJ....ppl with no BL info test better at times

**6:54:51 PM Ajay Balamurugadas** Its not hard to test application; knowledge of business logic might help us,

**6:55:18 PM eusebiu blindu** Yeah but I said [6:53:10 PM] eusebiu blindu: I would still hire testers with no BL knowledge then knowledge with no testing skills as long as there is a certain time to adjust

**6:55:26 PM Ajay Balamurugadas** but its not hard, As a tester, i might spend some time getting info and continue to apply that knowledge

**6:55:42 PM meeta prakash** specially for black box testing, they can replicate max weird entries that an end user can make

**6:55:58 PM eusebiu blindu** as part of ET we will learn, but lets be honest here we only covered unimportant issues

**6:56:09 PM meeta prakash** best on team for UAT

**6:56:29 PM Ajay Balamurugadas** Well, IT DEPENDS :)

**6:56:43 PM Ram** business logic: is it not one of the intents in these missions, reverse engineer and understand the logic with variable inputs and analyze output in the amount of time you would have here in this mission; as @sebi and @markus say, this forum is not probably appropriate to go over all the business logic and rules; but know enough to proceed with testing and exploring; thereby learn.

**6:56:51 PM meeta prakash** and exploratory and unidentifiable issues

**6:57:10 PM Madhukar** :)

**6:57:42 PM Markus Gärtner** ok, but let's focus on the portion that sebi mentioned

**6:57:47 PM Madhukar** well we are deviating from the mission....

**6:57:57 PM Ram** agree with @ajay, there is always a concept of Progressive Elaboration , learn as we go and apply the learned knowledge to know more

**6:58:02 PM Markus Gärtner** he said, that - given one hour of time - it's hard to learn a business domain as online brokerage

**6:58:43 PM Markus Gärtner** ok, madhukar, I think this is the perfect time to start your report :)

**6:58:56 PM Madhukar** Yups

**6:59:13 PM Madhukar** Well for me i am very active trader in Indian Equities market even though i stay at Singapore. But not even a single day goes without me keeping a track of Indian markets. Hence i did not had any difficulty in understanding the workflow of the site. I generally use Indian trading site for transactions and from my experience i can say that this B and D website lacks many basic imp features like reports generation, Portfolio showing overall losses and gains,

**6:59:56 PM Madhukar** I would say that since i knew trading activites i was very much involved in doing a comparison of B&D Site with other trading sites that i have used

**7:00:28 PM Madhukar** Few bugs which i noticed were the ability to enter characters in Numerical Fileds for example when i want to buy shares.

**7:00:43 PM Madhukar** even after entering characters no error message is shown

**7:00:54 PM Madhukar** and neither is the user allowed to do that transaction

**7:02:14 PM Madhukar** I also found that basic information about past transactions done, what date and time were they done also seemed to be missing

**7:02:38 PM Markus Gärtner** well, noticing the copyright from 2000, the side might be outdated by now

**7:03:09 PM Markus Gärtner** ok, so, madhukar, what did you learn about your learning?

**7:03:35 PM Madhukar** I learnt that only Good players survive in this game

**7:03:52 PM Markus Gärtner** I think this needs some elaboration :>

**7:03:57 PM eusebiu blindu** :)

**7:04:02 PM eusebiu blindu** I think so

**7:04:37 PM Madhukar** the better features and services you provide to end users in terms of details and other things are the key features of a trading platform

**7:05:18 PM Markus Gärtner** ah, now I understand :>

**7:05:19 PM Madhukar** The platform shoudl execute transactions instantly and not take time to execute them at the Terminals Server since even a slight delay in execution

**7:05:29 PM Madhukar** might cause lot of loss to the clients

**7:05:42 PM Markus Gärtner** did anyone run into this application before?

**7:06:00 PM Madhukar** NO

**7:06:43 PM Ajay Balamurugadas** no

**7:06:46 PM Ram** great. "involved in doing a comparison of B&D Site with other trading sites that i have used" -> so applied a "relative" theory to an extent to compare the other relative site to test this website? or was it based on the general thumbrules for a brokerage transactions website to have?

**7:07:10 PM Markus Gärtner** I think it's the "F" in the HICCUPPS(F) heuristic

**7:07:30 PM Madhukar** It was based on a general thumbrule for a brokerage website to have at the minimum level

**7:07:30 PM Ajay Balamurugadas** Its the comparable products

**7:07:48 PM Markus Gärtner** you're right, ajay, f is familiar problems

**7:07:50 PM Madhukar** since i used a similar platform it made the task easy for me

**7:08:19 PM Markus Gärtner** ok, anything left you might want to add, madhukar?

**7:08:24 PM Madhukar** Nopes

**7:08:24 PM Markus Gärtner** questions?

**7:08:40 PM Markus Gärtner** then I would ask ajay to go next :)

**7:08:45 PM Madhukar** Now 1 AM in the morning :)

**7:08:54 PM Ajay Balamurugadas** First Impressions: This website looks a very small website with limited number of links.

Functionality: I spent few minutes to go through the basic model of the website. I got to know that its similar to shares, stocks, buy, sell model.

I tried a simple scenario, bought some stocks/shares and tried some basic operations of selling more than the number of stocks I had, few stocks/shares than what I had and some null stocks.

Logged 4 bugs.

**7:09:52 PM Markus Gärtner** ok

**7:10:02 PM Markus Gärtner** thanks, what did you learn?

**7:10:33 PM Ajay Balamurugadas** Continue to participate in EWT sessions.

**7:10:51 PM Markus Gärtner** ok, ajay's the winner for today :P

**7:11:02 PM Markus Gärtner** (just kidding)

**7:11:04 PM Ram** @ajay i liked your summary structure and your conclusion :)

**7:11:25 PM Markus Gärtner** did you learn about stocks and brokerage?

- 7:11:33 PM Ajay Balamurugadas** Bug Advocacy has a good effect on me.
- 7:11:50 PM Ajay Balamurugadas** I had a prior knowledge of stocks, shares.
- 7:12:00 PM Markus Gärtner** awww, so you tricked me :P
- 7:12:07 PM Ajay Balamurugadas** Tricked?
- 7:12:16 PM Ajay Balamurugadas** I have never traded though
- 7:12:33 PM Markus Gärtner** ok
- 7:12:53 PM Markus Gärtner** any questions to ajay?
- 7:13:43 PM Markus Gärtner** so, you had the same basic lack of business domain knowledge as sebi, or did you have more?
- 7:14:10 PM Markus Gärtner** or even less? but I don't think so after your claim to know about shares and stocks
- 7:15:02 PM Ajay Balamurugadas** I think I know /a bit / but that was more than enough for this website but if compared to Business Logic, my knowledge would be negligible
- 7:15:12 PM Ram** "relative theory" "comparable products" -> so in this context, in general, what is your (ewt27 participants) opinion on testing based on comparison? the requirement might be different in different products. compare Apples to Apples or Apples to Oranges? although some properties and methods might be same between Apples and Oranges but some are obviously different.
- what is your general take on this approach?
- 'm sorry if i am interrupting the flow of discussion here :)
- 7:16:02 PM Ajay Balamurugadas** Its a heuristic. Fallible method to solving a problem.
- 7:16:18 PM Markus Gärtner** well, you can compare openoffice with ms office, but comparing windows with the KDE desktop doesn't make that much sense to me
- 7:16:45 PM Ajay Balamurugadas** Depending on different contexts, it might aid your testing or hinder your activity. Well said Markus.
- 7:17:02 PM Madhukar** Yes i agree with Markus
- 7:17:11 PM Ajay Balamurugadas** We have to remember that its a heuristic...
- 7:17:25 PM Markus Gärtner** and we have to remember that heuristics are fallible
- 7:17:30 PM Ajay Balamurugadas** exactly
- 7:17:34 PM Madhukar** :)
- 7:17:51 PM Markus Gärtner** ok, meeta, do you want to go next?

**7:19:49 PM meeta prakash** @ram if you do not know sufficiently enough on the application under test on its functional and non functional requirement, the method of comparison between existing system and system under test becomes significant... hence heuristics come into play

**7:21:57 PM meeta prakash** I started with trap of finding EWT 27 on bug reporting tool's screen identified some issues..... many issues were there where I was not sure on the business requirement of this application

1. training pages not available on website. Alternate link was SQE home page which was very confusing to locate exactly what I was looking for 2. entered junk values while creating account and it accepted. 3. Could create any falsified identity and enter 4.I created 1 account and with same I could enter both SSL And non SSL categories 5. Could create multiple accounts with same authorization code

lost some bugs as summary section was not written in with a value. Back tracing did not help as page was refreshed

6.logout does not take me to home page. I need to search for my home page url and refresh. 7. if you reject one trade value entered, refresh by backbutton and submit again, it accepts the transaction viceversa also works.

8.Risk associated with someone can impersonate or use cookies and make changes 9.decimal trade quantity accepted 10.even though trade values are entered, it does not reflect properly in holdings and open orders. In my case, nothing updated actually

**7:22:41 PM meeta prakash** learning : be conscious of traps

**7:22:54 PM Ajay Balamurugadas** [10:51:59 PM] meeta prakash: 4.I created 1 account and with same I could enter both SSL And non SSL categories

<< I feel its ok as its your choice of going SSL or non-SSL

**7:22:58 PM Markus Gärtner** that seems to be something reoccurring :)

**7:23:46 PM Ajay Balamurugadas** [10:51:59 PM] meeta prakash: Back tracing did not help as page was refreshed

<< This happens with most of the bank webpages / trading webpages

**7:23:52 PM meeta prakash** @AJ but then what about your account info ? will both reports merge and be visible on any of links ? ...I am not sure how the application handles that

**7:24:15 PM Markus Gärtner** oh, there is just one auth code

**7:24:30 PM Markus Gärtner** at least just one which I'm aware of :)

**7:25:26 PM eusebiu blindu** Bug: only one auth code should be used /per session :)

**7:25:40 PM Ram** @meeta agreed, as Jon Bach had pointed out - " testing is an INFINITE process of comparing the INVISIBLE to the AMBIGUOUS in order to avoid the UN-THINKABLE happening to the ANANYMOUS"

- 7:26:09 PM Markus Gärtner** that's crisp
- 7:26:38 PM Markus Gärtner** well, it might be time that I reveal where we got the application from
- 7:26:45 PM Markus Gärtner** is anyone interested in this?
- 7:26:52 PM Ram** @markus sure
- 7:26:54 PM Ajay Balamurugadas** How many of you tested on 800 x 600 resolution?
- 7:27:01 PM meeta prakash** I saw SQE .....
- 7:27:06 PM Markus Gärtner** SQE, sure
- 7:27:26 PM Markus Gärtner** I crossed it in a book as a case study
- 7:27:53 PM Markus Gärtner** A Practitioner's Guide to Software Test Design by Lee Copeland
- 7:28:41 PM Markus Gärtner** they use the brokerage page there to explain test design techniques, so in case you're curious for more, maybe you should get that book :)
- 7:29:09 PM Markus Gärtner** one interesting thing I noticed is while the book mentions there is some documentation available, no one pointed that out in their particular report
- 7:29:52 PM meeta prakash** @AJ i checked on 32 bit 1024 X600
- 7:30:29 PM Markus Gärtner** oh, the pages were created for SQE earlier, so testing on 800 x 600 might be reasonable here, I think
- 7:30:50 PM Ajay Balamurugadas** they mentioned the recommended settings
- 7:31:34 PM Markus Gärtner** i see
- 7:31:35 PM Ram** i believe the documentation part was in one of the messages above, that the links weren't functioning; noticed page not found page for the documentaiton links; i tried to get there to get the authorization code ;
- 7:32:08 PM Markus Gärtner** yeah, you mentioned it, made me wondering if they put the docu off their site
- 7:32:55 PM Markus Gärtner** we seem to have approached the 2 hours of our session
- 7:32:59 PM Ajay Balamurugadas** <http://bdonline.sqe.com/documents/requirements.DPF>
- 7:33:10 PM Ajay Balamurugadas** Change DPF to PDF if you want to download it
- 7:33:24 PM Markus Gärtner** ah, a typo
- 7:33:29 PM Ajay Balamurugadas** not a typo

- 7:33:45 PM Ajay Balamurugadas** I don't want people to shout at me for unwarranted download ;)
- 7:34:03 PM Markus Gärtner** :)
- 7:34:43 PM Ajay Balamurugadas** unfortunately, I was focussed on creating account and jumping in. Missed the links on home page
- 7:34:49 PM Markus Gärtner** all web pages should be w3c html 4.0 compliant sounds like a testable requirement (just skimming the doc)
- 7:35:23 PM Markus Gärtner** ok, so maybe there is some potential for some follow-up testing here
- 7:35:36 PM Ajay Balamurugadas** lots
- 7:35:54 PM eusebiu blindu** We can analyse it an then blog about t
- 7:36:30 PM Markus Gärtner** but for today, let me close EWT27. Thanks that you signed up and joined. I hope you enjoyed it. Oh, in case you blog about it, you may want to link to weekendtesting.com. Session report will be up there, shortly.
- 7:36:52 PM meeta prakash** :) thanks Markus
- 7:37:14 PM Ajay Balamurugadas** Thanks, I found a treasure here. lots to test and test myself too
- 7:37:28 PM meeta prakash** and thanks to your connectivity also ...did not see u dropping off at any time
- 7:37:47 PM Ajay Balamurugadas** Thanks Markus, and other participants too :)
- 7:37:48 PM Markus Gärtner** oh, yeah, my isp seems to have improved their net
- 7:38:11 PM eusebiu blindu** Thanks all
- 7:38:18 PM meeta prakash** :)
- 7:38:23 PM Ram** it was a great discussion; although it was too late when i logged in. thank yo
- 7:38:43 PM Markus Gärtner** oh, ram, it's never too late to test some software, though :)
- 7:38:56 PM Markus Gärtner** saw pari testing one of our missions even weeks after once
- 7:39:14 PM eusebiu blindu** that's crazy :)
- 7:39:22 PM eusebiu blindu** (kidding)
- 7:39:33 PM Ajay Balamurugadas** passion
- 7:39:44 PM Ram** agreed, i still go on the puzzle website to test some puzzles, that i got to know on my first WT participation 2 months ago.

**7:39:56 PM Markus Gärtner** fantastic! :)

**7:41:06 PM meeta prakash** actually thats the core mission WT sessions have .....develop passion for testing and remove thots of 'checking' from tester's minds

**7:41:15 PM Ram** i learning something new, something more at every WT participation here

**7:41:26 PM Ajay Balamurugadas** You are not alone Ram :)

**7:41:31 PM meeta prakash** AJ can add

**7:41:58 PM Ajay Balamurugadas** Good Night

**7:42:07 PM Markus Gärtner** bye all

**7:42:11 PM eusebiu blindu** Bye

**7:42:16 PM meeta prakash** bye

**7:42:16 PM Ram** good night singapore and India

**7:42:35 PM Ram** see you next week

**7:43:35 PM Ram** have a great day the rest; see you later.
