

Weekend Testing Session - Does LLM listen to you?

[10th August, 3:45 PM] Weekend Testing: Hello Team, Welcome everyone, we will be starting in 15 mins from now.

[10th August, 4:00 PM] Weekend Testing: Welcome everyone, once again. My name is Ajay Balamurugadas, your facilitator for today. Testing software for 18+ years, love talking about software testing with people and help solve problems. Based out of Bangalore.

What about you? Please introduce yourselves. Seeing some familiar faces :) Only chat, no need of call.

[10th August, 4:00 PM] Weekend Testing: No need to call. It will be all chat based

[10th August, 4:02 PM] Deepan: Hi everyone, I'm Deepan I'm practicing software testing for 10+ years, working with SecureW2, Chennai, India.

[10th August, 4:02 PM] Ahilesh: My name is Ahilesh Manickavasagan Testing software for 10+ years, learning to be better in Tech and Testing the Tech. Based out of Orgeon USA.

[10th August, 4:03 PM] Weekend Testing: Welcome, Deepan, Ahilesh :)

[10th August, 4:03 PM] Deepan: Hey Ajay, Ahilesh

[10th August, 4:04 PM] Weekend Testing: For those who are joining weekend testing for the first time, this is how a session goes.

For the first one hour, we will work on a mission. Feel free to work solo, or pair with fellow tester. You can use any tools, approach, no restrictions. Feel free to ask as many questions as possible.

The next one hour, we will discuss about the session, our approach and any other questions.

[10th August, 4:06 PM] Sandeep: Hello @everyone. Sandeep Garg, this side. 18+ overall exp. Hands-on Tester / QA Manager @ Bridgetree Research Services Private Limited. :). Good to be here after a long time :)

[10th August, 4:06 PM] Weekend Testing: Welcome, Sandeep :)

[10th August, 4:06 PM] Weekend Testing:

Today's mission:

Weekend Testing Session - Does LLM listen to you?

Use any LLM to create a test report with the following sections:

- a) Overview
- b) About the report
- c) Describe Weekend Testing website <https://www.weekendtesting.com>
- d) Highlight bugs and improvement areas
- e) Conclude the report

Make a list of all the prompts and be ready to share the chat link at the end of one hour or when the report is ready.

Pay attention to the question - Does LLM listen to you as you prompt?

[10th August, 4:06 PM] Sandeep: So what's the mission @Ajay? Unless I missed something :)

[10th August, 4:08 PM] Weekend Testing: It will be a good idea to list out the LLM you are using, beforehand too

[10th August, 4:09 PM] Weekend Testing: Any questions - Hope you understood the mission

[10th August, 4:11 PM] Weekend Testing: Unless you ask, you may not get the answers :|

[10th August, 4:12 PM] Sandeep: I have two questions on the question.

1. 'As you prompt' - Does it mean as we start typing inside the box allowing Text prompt to enter?
2. Listen - Does it mean Speaking using Microphone along with Text prompt?

[10th August, 4:13 PM] Weekend Testing: 54 mins remaining

1. Yes, text prompts
2. Listen - follows your instruction or gives something that you did not expect?

[10th August, 4:13 PM] Sandeep: Okay

[10th August, 4:14 PM] Ahilesh: so we have to write text prompts for the LLM to test the weekend Testing website and generate the report in given format?

[10th August, 4:14 PM] Deepan: 1. Do you expect the report to be in a specific format?

[10th August, 4:15 PM] Weekend Testing: so we have to write text prompts for the LLM to test the weekend Testing website and generate the report in given format?

Weekend Testing Session - Does LLM listen to you?

Write prompts to help you write the report. using LLM to test the website is up to you, not part of this mission

[10th August, 4:15 PM] Weekend Testing: 1. Do you expect the report to be in a specific format? Any format that lives up to your quality standards

[10th August, 4:19 PM] Sandeep: 1. Any specific bugs and Improvement areas on priority to know?

[10th August, 4:20 PM] Weekend Testing: The focus is on

1. Overall flow of the home page
2. Spelling mistakes on Home, About Us pages
3. Filter and navigation on "Reports" page

[10th August, 4:23 PM] Weekend Testing: Which LLM are you all using?

[10th August, 4:24 PM] Sandeep: Deepan Ahilesh

1. What OS/Browser you are choosing?
2. What bugs you would be looking for?
3. Can we distribute specific areas and expedite the testing?

[10th August, 4:25 PM] Sandeep: I am starting with CoPilot, Then ChatGPT. HOw about you Ahilesh Deepan?

[10th August, 4:25 PM] Deepan: I'm starting with Chat GPT, I found a custom GPT named QA Test Report Generator, going to try that out
<https://chatgpt.com/g/g-b29whXoP2-qa-test-report-generator>

[10th August, 4:26 PM] Ahilesh: I am using Windows/Chrome Browser
I just started with Spelling mistakes. I am using GPT 3.5 LLM

[10th August, 4:27 PM] Sandeep: Deepan - can you take filter and I take Flow?

[10th August, 4:27 PM] Deepan: Sandeep

1. Edge Browser
2. I will look for UI / Usability
3. Yes, you can focus on other areas like functional, security, performance

Weekend Testing Session - Does LLM listen to you?

[10th August, 4:28 PM] Deepan: Sure Sandeep

[10th August, 4:28 PM] Deepan: I will take filter

[10th August, 4:30 PM] Sandeep: Okay I take one on Mobile Browser to see flow and UX there.

I am assuming that website is renovated keeping in mind CBT and RWD. Weekend Is my assumption safe?

[10th August, 4:30 PM] Deepan: Sandeep filters are not working, there is a blocker. I cannot proceed further, shall I take other flow

[10th August, 4:31 PM] Sandeep: Continue please

[10th August, 4:31 PM] Deepan:Ok

[10th August, 4:31 PM] Weekend Testing: Okay I take one on Mobile Browser to see flow and UX there.

I am assuming that website is renovated keeping in mind CBT and RWD. Weekend Is my assumption safe?

We don't know - let us test it out :)

[10th August, 4:33 PM] Weekend Testing:

CBT = Cross Browser Testing

RWD = Responsive Web Design

Hope my assumption is right

[10th August, 4:33 PM] Sandeep:yes Weekend

[10th August, 4:35 PM] Ahilesh: Weekend Hope for English spelling we have to follow UK English

[10th August, 4:36 PM] Weekend Testing: Any inconsistency can be highlighted

[10th August, 4:39 PM] Weekend Testing: last 27 mins left (time)

[10th August, 4:53 PM] Weekend Testing: hope your reports are getting ready. Send them here. Last 7 mins for the testing session to end

Weekend Testing Session - Does LLM listen to you?

[10th August, 4:59 PM] Weekend Testing: Time to wrap up :) Last one minute.

[10th August, 4:59 PM] Deepan: Weekend can you give 5 more minutes, just wrapping upee

[10th August, 5:00 PM] Weekend Testing: 1 more min max :)

[10th August, 5:00 PM] Weekend Testing: or maybe 2 more

[10th August, 5:00 PM] Weekend Testing: Ahilesh, Sandeep - what about you

[10th August, 5:00 PM] Ahilesh: same

[10th August, 5:00 PM] Ahilesh: another couple of minutes Weekend

[10th August, 5:00 PM] Deepan: myself and Sandeep are working together

[10th August, 5:02 PM] Ahilesh: Here is my report Weekend

<https://chatgpt.com/c/77d3acc2-02b2-485e-b56b-32218bead5bf>

[10th August, 5:03 PM] Weekend Testing: Unable to load conversation
77d3acc2-02b2-485e-b56b-32218bead5bf

[10th August, 5:03 PM] Deepan:

<https://chatgpt.com/g/g-b29whXoP2-qa-test-report-generator/c/635cb8c9-998f-431f-b963-6788b52dbc26>

[10th August, 5:04 PM] Ahilesh: please try this

[Ahilesh_Report](#)

[10th August, 5:04 PM] Weekend Testing: It is opening the Report Generator but not your report

[10th August, 5:04 PM] Deepan: [Deepan_Report](#)

[10th August, 5:04 PM] Deepan: please use this Weekend

[10th August, 5:05 PM] Weekend Testing: Ok lets discuss

[10th August, 5:04 PM] Weekend Testing: Who wants to start :)

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:05 PM] Ahilesh: I will start

[10th August, 5:06 PM] Weekend Testing: sure

[10th August, 5:07 PM] Weekend Testing: Deepan and Sandeep - you can keep your notes typed and ready

[10th August, 5:08 PM] Deepan: Ok

[10th August, 5:09 PM] Ahilesh: I will be honest, at the start it looked like a cup of cake but then I wasted a lot of time in thinking rather than doing it

So I did not test the application better ..

I am not sure if LLM understood the context or not

May be if I had shared it any sample report it would have done it better , right now I am not sure whether it just improved the English language of the report or generated the report correctly

[10th August, 5:09 PM] Weekend Testing: ok

[10th August, 5:07 PM] Weekend Testing: fair point - what was your approach

[10th August, 5:11 PM] Ahilesh: so these are steps I followed

1. I told LLM chat , what chat was this for , I built the context that it was an experienced tester and knows how to create the reports

2. Then I told it ensure the given sections where included

3.Finally provided the required data to it

[10th August, 5:11 PM] Weekend Testing: one prompt or multiple prompts?

[10th August, 5:12 PM] Ahilesh: I used two prompts

first two points in one prompt, the last one in another prompt

[10th August, 5:12 PM] Weekend Testing: ok lets listen to Deepan and Sandeep before we come back to you

[10th August, 5:13 PM] Ahilesh: sure

[10th August, 5:13 PM] Weekend Testing: Deepan, Sandeep - you want to share your experience?

[10th August, 5:14 PM] Weekend Testing: Deepan

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:14 PM] Deepan: After the mission is assigned, I recently came across the custom GPT, I haven't tried it before but just wanted to try it now, I look for custom GPT and found QA Report Generator, I have chosen it for reporting

Got few inputs from other member questions and started focusing on UI / UX first, then Sandeep wanted to split a different flow then I started look into filters and found that it was not working completely.

Then started focusing on UI / UX, went on call with Sandeep and was discussed the issues we noticed, Sandeep was covering the CBT and Geo location testing.

I started creating the prompt, got the report reviewed them once looks Good to me, Sandeep added few more inputs and added 1 more prompt to include it.

[10th August, 5:15 PM] Weekend Testing: ok, did you use multiple prompts or no?

[10th August, 5:15 PM] Weekend Testing: Given another chance, what would you all three do?

[10th August, 5:16 PM] Ahilesh: I would give a single prompt itself but this time I will attach a sample report as well

[10th August, 5:16 PM] Deepan: will try to add more prompts, try some other LLM and see how others generates the same report for similar prompt

[10th August, 5:17 PM] Weekend Testing: ok, how much do you use LLMs in the daily context

[10th August, 5:18 PM] Deepan: I'm still not used to use it on daily basis but I would say I'm using 10 - 20% max weekly

[10th August, 5:18 PM] Sandeep: I am at ~10% as of now on LLMs and that too specific to CoPilot followed by GPT3.5 for Data and Code generation standpoint

[10th August, 5:19 PM] Ahilesh: I use it instead of google search on daily basis

[10th August, 5:19 PM] Weekend Testing: ok

[10th August, 5:19 PM] Weekend Testing: Have you heard of markdown

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:19 PM] Deepan: No

[10th August, 5:19 PM] Ahilesh: No

[10th August, 5:20 PM] Sandeep: Heard and Used but not today so far

[10th August, 5:20 PM] Weekend Testing: Paste your final test report here once.

[10th August, 5:20 PM] Ahilesh:

Test Report: Weekend Testing Website

Overview

This test report presents the findings from a detailed examination of the Weekend Testing website's homepage, specifically focusing on identifying spelling and grammatical errors.

About the Report

This report covers the testing of the homepage of the Weekend Testing website, with an emphasis on detecting any spelling mistakes or grammatical inconsistencies. Please note that the scope of this report is limited to the homepage, and no other pages were tested.

About the Weekend Testing Website

The Weekend Testing website serves as a hub for industry experts to come together and conduct thorough testing of various applications over the weekend. It highlights the collaborative efforts of professionals in identifying and resolving issues across different software.

Identified Bug

Bug 1: The phrase "Does LLM listen to you" was found on the homepage. It should be corrected to "Does the LLM listen to you" to ensure proper grammar.

Conclusion

The assessment of the Weekend Testing homepage revealed that the grammar used throughout is consistent and correct, with the exception of one identified bug. No other spelling or grammatical errors were found.

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:21 PM] Deepan:

WeekendTesting.com Test Report

Overview

This test report outlines the findings from a focused usability, functional, and security assessment of the WeekendTesting.com website. The testing aimed to identify any GUI issues, performance bottlenecks, cross-browser compatibility challenges, user experience concerns, and security vulnerabilities. The primary focus was on the Home Page and Report Page, with additional testing conducted for geo-location accessibility in the US region. The testing was conducted by Deepan and Sandeep.

Website Description

WeekendTesting.com is a platform that fosters learning and skill enhancement for software testers through weekend testing sessions. It encourages a collaborative approach, enabling testers worldwide to share their knowledge, experiences, and insights. The website serves as a resource hub, offering various reports, transcripts, and tools to aid testers in their professional development.

Bugs and Improvement Areas

Home Page

Bug | GUI | Perimeter Test Failed: The left/right navigation icons on the banner fail to function correctly.

Bug | Performance | Banner Slider Speed: The frames in the banner slider are moving too fast, which negatively impacts usability.

Bug | Cross Browser Testing (CBT) | Safari Browser: The email link is not functioning properly on Safari, displaying an "invalid address" error. The issue was not present on Edge or Firefox.

Improvement | UX | Testimonials Grid: The grid layout for testimonials should be uniform in size to enhance visual appeal. The current layout features grids of varying sizes, detracting from the overall look.

Improvement | UX | Text Alignment: The text in each component should be aligned as justified for a more polished appearance.

Report Page

Bug | Security Vulnerability | Filters and Navigation: A 400 status code reveals the admin page at <https://www.weekendtesting.com/wp-admin/admin-ajax.php>, posing a potential security risk.

Bug | UX | Navigation: Users have to hit the back button to navigate back to the main reports page, leading to a poor user experience.

Weekend Testing Session - Does LLM listen to you?

Improvement | UX | Naming Consistency: The menu item is labeled "Transcript," but the page title and content refer to "Reports." These terms should be unified for consistency.

Geo-Location Testing

Region: USA: The site loaded successfully without any issues, confirming good performance in the US region.

Conclusion

The testing, conducted by Deepan and Sandeep, revealed several issues across different categories, including GUI, performance, cross-browser compatibility, user experience, and security. Addressing these bugs and improvements will significantly enhance the site's usability, security, and overall user satisfaction. Additionally, geo-location testing confirmed that the site is accessible and performing well in the US region. Prioritizing the identified security vulnerability and UX improvements will be critical to ensuring a safe and user-friendly website.

[10th August, 5:22 PM] Weekend Testing: ok thanks, this is useful

[10th August, 5:22 PM] Weekend Testing: A small suggestion - whenever you get a task related to LLM, try breaking the task down into sub tasks

[10th August, 5:23 PM] Sandeep: Wow Deepan very Nice :)

[10th August, 5:23 PM] Sandeep: Noted Weekend

[10th August, 5:23 PM] Weekend Testing: Use multiple prompts

[10th August, 5:23 PM] Weekend Testing: Prompt 1: List out the sections in the Home page

[10th August, 5:23 PM] Sandeep: Ahilesh Nice one

[10th August, 5:23 PM] Weekend Testing: Prompt 2: List out the ideas for the individual sections

[10th August, 5:25 PM] Weekend Testing: Even before all these prompts, you can say

Context

and write the context/role the LLM has to assume

[10th August, 5:25 PM] Weekend Testing:

INSTRUCTIONS

Weekend Testing Session - Does LLM listen to you?

Be polite, and terse. No intro/outro please

[10th August, 5:26 PM] Weekend Testing:
FORMAT
Output in the form of a numbered list.

Next Prompt - Tell how you want

[10th August, 5:26 PM] Weekend Testing:
especially any changes, you want

[10th August, 5:27 PM] Weekend Testing:
The more detailed, the better. But split them into multiple prompts and try

[10th August, 5:27 PM] Weekend Testing:
what do you think

[10th August, 5:29 PM] Sandeep: Makes sense. Agree.

[10th August, 5:29 PM] Weekend Testing: and if you start using paid version, it is a good intern to get things done

[10th August, 5:29 PM] Weekend Testing: which also learns from your feedback

[10th August, 5:30 PM] Deepan: Agreed to the multiple prompts Weekend

[10th August, 5:30 PM] Weekend Testing: ok Deepan. Any questions? Ahilesh, Sandeep?

[10th August, 5:30 PM] Weekend Testing: I liked how you brought up the custom GPT

[10th August, 5:31 PM] Weekend Testing: it is like how extensions were popular at one time

[10th August, 5:31 PM] Ahilesh:
Weekend any recommended extension to check spellings in the website?

[10th August, 5:32 PM] Weekend Testing: I am not aware. View source - copy - excel/docs - spelling check?

[10th August, 5:32 PM] Ahilesh: That would have been more easy..i did not think that of

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:32 PM] Deepan: Weekend so the markdown you mean to split it to multiple prompts, so that we will get better results?

[10th August, 5:32 PM] Weekend Testing: Markdown is using #, **, any symbol to differentiate

[10th August, 5:33 PM] Weekend Testing:

Context

Instructions

Output

Data

[10th August, 5:33 PM] Deepan: oh Ok, got it. I used it but not aware of the term.

[10th August, 5:34 PM] Weekend Testing: some other uses:

You are my Meeting Bot. You will remember whom I met and what we discussed.

Format to maintain is Date | Name | Key Words | Minutes | Action items.

Maintain this in a tabular form

When I type "list", list out the names and key words in a table with a number.

Ask for a number if I want more details.

[10th August, 5:34 PM] Weekend Testing:

CONTEXT

You are a software testing expert with good software testing services industry knowledge. You have worked in e-commerce projects and understand the ins and outs of e-commerce across giants. You understand the overall landscape including the frontend, backend, middle layer.

TASK

For every question that I ask, if it is prefixed with "Q", please ask me more questions to clarify the question. Think on the lines of the following:

1. What am I missing
2. Am I over simplifying it
3. Am I making it complex

Also, let me know your thoughts and name it *MY THOUGHTS*

INSTRUCTIONS

Always give me the answers in a numbered bulleted list unless specified with sub-bullets if necessary.

Be terse. No intro/outro please

Weekend Testing Session - Does LLM listen to you?

Are you ready for today's exercise?

[10th August, 5:35 PM] Weekend Testing: helps to read easily

[10th August, 5:36 PM] Weekend Testing: how did you feel about today's session?

[10th August, 5:37 PM] Sandeep: I felt very good.

[10th August, 5:37 PM] Sandeep: Nice to be on weekend testing after a long time.

[10th August, 5:38 PM] Ahilesh: I tried the options you said once again Weekend this time it generated a better report

<https://chatgpt.com/share/1203f1ef-9b66-4b8c-bded-37588fd886d2>

[10th August, 5:38 PM] Sandeep:

Sense of urgency

Play on expertise

Knowing what can be learned and done better

[10th August, 5:38 PM] Sandeep: Most importantly Working Together.

[10th August, 5:38 PM] Ahilesh: I did not try the markdown approach though , that is something I learnt today and it provides better context as well

[10th August, 5:38 PM] Deepan:

It was Good, I never used multiple prompts always used to ask everything in single prompt, I will try it out

[10th August, 5:39 PM] Ahilesh: Time Boxed Testing gives you an adrenaline rush :) It's almost two hours since we started and felt like 5 mins

[10th August, 5:39 PM] Weekend Testing:I tried the options you said once again Weekend this time it generated a better report

<https://chatgpt.com/share/1203f1ef-9b66-4b8c-bded-37588fd886d2>

Yes, this is much better

[10th August, 5:40 PM] Weekend Testing: yes, this safe environment pressure will sharpen our skills and make us ready for real time scenarios

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:41 PM] Weekend Testing: and in a single prompt also, you can use symbols for the headings, use space between sections

[10th August, 5:42 PM] Ahilesh: Will try that Weekend ..
How was your experience Weekend and Sandeep with LLM?

Does the LLM listen to you? or it needs to improve even with multiple prompts?

[10th August, 5:44 PM] Sandeep: They Listen. Yes!

Give them Clarity on Context, Preciseness on Wordings, They usually respond fine

[10th August, 5:44 PM] Weekend Testing: :)

[10th August, 5:44 PM] Weekend Testing:
have you noticed that the emojis are gone and replaced with text

[10th August, 5:44 PM] Ahilesh: yes

[10th August, 5:44 PM] Deepan: yeah

[10th August, 5:44 PM] Ahilesh: it says smile

[10th August, 5:45 PM] Weekend Testing: smile :)

[10th August, 5:45 PM] Deepan: :)

[10th August, 5:45 PM] Weekend Testing: now which one is text and which one is emoji

[10th August, 5:45 PM] Ahilesh: I was cross checking with mobile to check if my desktop app has issues

[10th August, 5:45 PM] Deepan: same here, I was restarting skype and googling about how to disable it

[10th August, 5:45 PM] Ahilesh: CWL for Crying with Laughter :)

[10th August, 5:45 PM] Sandeep: :) SMILE smile

[10th August, 5:46 PM] Weekend Testing: haha

Weekend Testing Session - Does LLM listen to you?

[10th August, 5:46 PM] Weekend Testing: ok, folks, thank you for attending the session as we have restarted after the revamp. The filters bug is fixed now

[10th August, 5:47 PM] Weekend Testing: this I think would be the pace of development in general, going on and we testers would have to dig deep into our skills to stand out and contribute

[10th August, 5:48 PM] Ahilesh: Thanks Ajay looking forward to more such sessions of weekend testing . Thank you Sandeep as always waiting to learn more from you

Thank you Deepan it was great knowing you today , hopefully we can do more sessions

[10th August, 5:48 PM] Deepan: Yes, I agree to it. Thanks Ajay for starting weekendtesting again, looking forward to join more session.Thanks Sandeep Ahilesh

[10th August, 5:48 PM] Ahilesh: this I think would be the pace of development in general, going on and we testers would have to dig deep into our skills to stand out and contribute so with LLM's is prompting the first step to learn?

[10th August, 5:48 PM] Weekend Testing: yes, please continue to join :) tell more friends

[10th August, 5:49 PM] Weekend Testing: Yes, getting better at prompting and knowing that it can make errors

[10th August, 5:49 PM] Sandeep: Thanks a ton Ajay, Deepan and Ahilesh! Learning is mutual my friends.

[10th August, 5:49 PM] Weekend Testing: <https://www.promptingguide.ai/>

[10th August, 5:50 PM] Weekend Testing: See you around, enjoy testing :)

[10th August, 5:50 PM] Weekend Testing: bye

[10th August, 5:50 PM] Deepan: Bye

[10th August, 5:50 PM] Ahilesh: Bye have a great day :)

[10th August, 5:50 PM] Sandeep: Bye everyone.
